## Avaya Scopia® XT7100 Quick Setup Guide

### Step 1. System Installation and Activation

1. Connect all cables to the Avaya Scopia XT5000 Codec Unit (see overleaf). Power supply must be connected after all other connections have been established.
2. Turn on the TV monitors. Monitor on HDMI1 is mandatory, monitor HDMI2 is optional.
3. Make sure the remote control has batteries installed.
4. Verify that the LED on the front panel of the Codec Unit is turned on.
5. If the codec unit does not turn on automatically, press the **OK** button on the remote control.
6. The graphical menu appears on the monitors.

### Step 2. Product Licensing

1. Retrieve your LAC (License Authentication Code) from your Customer Letter
2. Access Product Licensing Delivery System (PLDS): <https://plds.avaya.com>
3. Fill in LAC and get the list of all related Entitlements
4. Provide the information on XT required on PLDS
5. The web form returns a license key that will enable the entitlements on your XT endpoint.

### Step 3. Country and Language of Interface

1. The System Name field displays the name of this Codec Unit as displayed in a videoconference, for example:
  - **Hong Kong**, or
  - **9th Floor Conf Rm**
2. Use the remote control keypad to type the name. Press **OK** to toggle letters or numbers and lower/upper case.
3. Select the **Country** and preferred **Language**.
4. Select the desired protocol type for registration: **only H.323**, **only SIP** or **both H.323 and SIP**
5. Then select **Next**

### Step 4. Graphics and Image Setup

If all the sides of the triangles 1 and 2 are visible on your monitor, select **next**.

1. Otherwise, press **1** to adjust the position of the top left corner.
2. Use the arrow keys to move the selected triangle until it is fully visible on your monitor. Press **OK** when done.
3. Press **2** to adjust the position of the bottom right corner.
4. Repeat the procedure using the arrows.
5. Press **OK** and **Next** when done.

### Step 5. Network Settings

1. Enter your network settings. For questions about this information, consult your system administrator and network administrator.
2. Then select **Next**.

### Step 6. Gatekeeper Settings

If H.323 is a selected protocol for registration, enter the Gatekeeper settings:

1. Enter your **Gatekeeper** settings and your E.164 number. For questions about this information, consult your system administrator.
2. Then select **Done**.

### Step 7. SIP Server settings

If SIP is a selected protocol for registration, enter the SIP Server settings:

1. Enter your SIP Server settings and your SIP User, SIP Name, and SIP Password (login code). For questions about this information, consult your system administrator.
2. Then select **Done**.

### Step 8. Moving the Camera

1. On the general screen, navigate to **Control Camera** using the arrow keys and press **OK**.
2. Use the arrow keys to move the camera to the preferred position.
3. Repeat the procedure if you have a second camera installed.
4. Press **Back** when done.

The Scopia XT7000 is the new generation Avaya's flagship product in the Scopia series of room systems. Unique simultaneous HD 1080p/60fps for live video and content and CD-quality, 20 kHz audio deliver an outstanding experience. H.265 and H.264 High Profile provide ultimate bandwidth efficiency. H.264 Scalable Video Coding (SVC) offers high network error resiliency. Netsense guarantees the ability to adapt to bandwidth changes.
